SUMMARY

As a Frontend Developer, I specialize in developing user-centric and high-performance web applications. With extensive expertise in HTML, CSS, JavaScript, and modern frameworks like React and Next.js, I deliver top-quality frontend solutions. My dedication to continuous learning and self-improvement ensures that I stay updated with the latest trends and technologies. I excel in collaborative environments, leveraging strong communication and problem-solving skills to create innovative and efficient solutions that meet user needs and business objectives.

PROJECTS

Weather App [🔗](#)

- *typescript, react, redux toolkit, axios, framer-motion*

The app lets users search cities and view real-time temperature, feels-like temperature, humidity, wind, and hourly forecasts.

Currency Converter App [🔗](#)

- *react, tailwind, axios*

Developed a currency converter application with a user-friendly interface for calculating exchange rates between different currencies. The app fetches live exchange rate data via API, providing instant information to users.

Random User App [🔗](#)

- *html, css, tailwind, vanilla javascript*

Random User App is a web application that asynchronously fetches random user information from an API and dynamically displays this data in a responsive interface, enhancing user interaction.
