Summary

As a Frontend Developer with a strong foundation in HTML, CSS, and JavaScript, I specialize in crafting seamless, user-centric applications using Next.js and React. Currently pursuing a degree in Computer Programming at İzmir University of Economics, I combine technical expertise with a collaborative mindset to deliver impactful digital solutions. Dedicated to continuous learning, I stay updated with emerging technologies to drive innovation and efficiency in my work.

Projects

Üniversite Değerlendir [↗](#)

- *nextjs, supabase, typescript, redux toolkit*

Designed a platform enabling users to anonymously rate and leave comments about universities in Turkey. Focused on creating an accessible and user-friendly interface for collecting and displaying ratings while ensuring user anonymity.

git.cow [↗](#)

- *nextjs, supabase, typescript, redux toolkit, motion*

Git Cow is a sophisticated web tool designed for developers who want a more efficient way to analyze their GitHub activity and project metrics.

Spotiwrap [↗](#)

- *nextjs, supabase, typescript, zustand*

Developed a web app using Spotify API that provides users with personalized insights into their listening habits, including top tracks, artists, and genres, along with dynamic data visualizations and shareable summaries.

Volunteer Experience

Co-Founder, Developer

08/2024 – present

Lumi Works [↗](#)

Co-founded an open-source organization focused on developing innovative, community-driven applications. This non-profit platform fosters collaboration, promotes impactful open-source projects, and empowers the global developer community through knowledge sharing and creativity.
